

Stress Test Three: Figures and Tables

D. Drawing

1 Pictures

A photograph-like raster image comes first. It is followed by a TikZ diagram with labels, a pgfplots chart, and a grid of four panels. The text between them must stay in order.

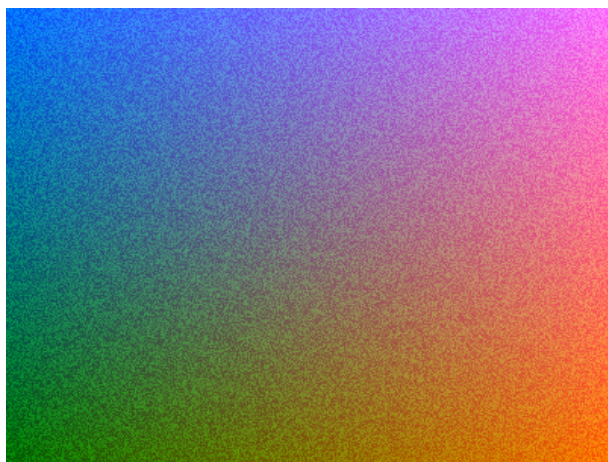

Figure 1: A raster image with a gradient.

This paragraph wraps around a small figure placed at the right margin. Wrapped figures are awkward because the lines of text beside them are shorter than usual, and a converter could mistake the figure's labels for part of the paragraph. We therefore write several sentences here, so that the paragraph is clearly longer than the figure is tall, and the text continues below the figure at full width again. The labels x and y and the letter A in the circle belong to the figure and should not be read as text.

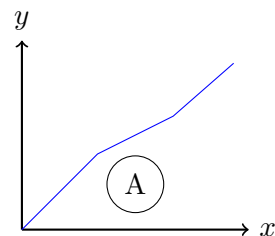

Figure 2: A TikZ sketch next to text.

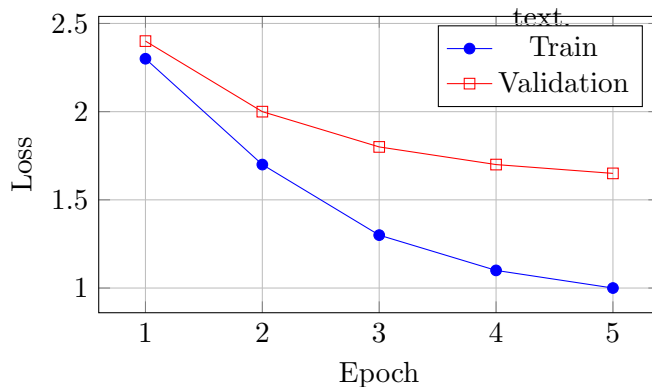

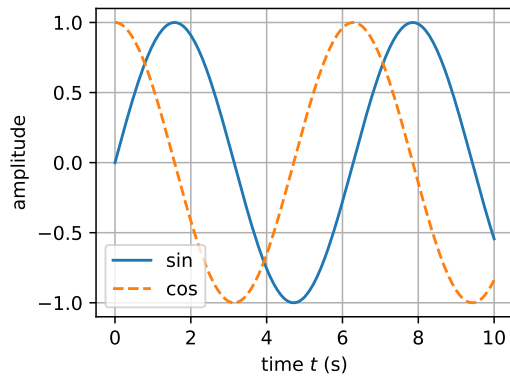

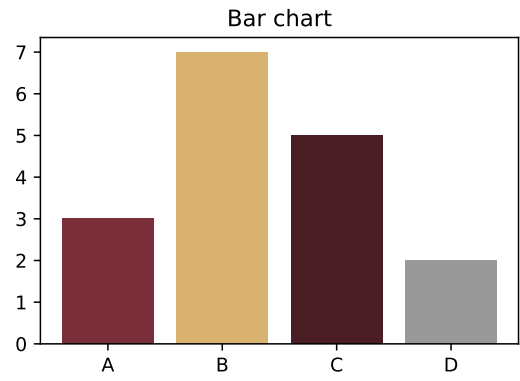

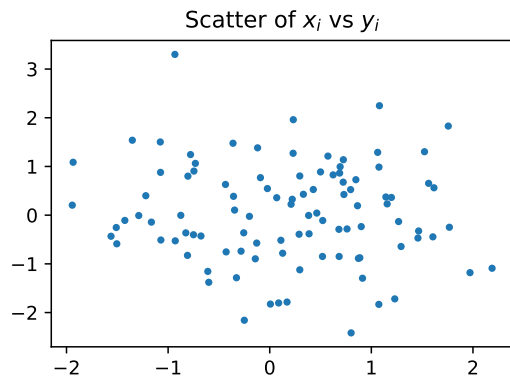

Figure 3: A vector chart drawn by pgfplots, with a legend and grid lines.

(b) Counts

(c) Points

(d) Heat

Figure 4: A two by two grid of panels (a)–(d).

2 Tables

Table 1 has formulas in its cells; Table 2 is wide.

Table 1: Formulas in cells.

Function	Derivative	Integral
x^n	nx^{n-1}	$\frac{x^{n+1}}{n+1}$
e^x	e^x	e^x
$\sin x$	$\cos x$	$-\cos x$
$\ln x$	$1/x$	$x \ln x - x$

A borderless table, as often found in reports:

Anna	Editor	2.14
Bram	Reviewer	3.02
Chen	Author	1.07

Table 2: A wide table with twelve columns.
